

The graph displays the partial pressure of arterial oxygen ( $\text{PaO}_2$ ) in mmHg over a 30-hour period. The y-axis ranges from 36 to 50 mmHg, and the x-axis ranges from 0 to 50 hours. The data points are connected by a line, showing a highly variable trend. Key events are marked: A (at 2 hours), B (at 14 hours), C (at 19 hours), and D (at 21 hours). The legend indicates that the line represents  $\text{PaO}_2$ .
